## Local Items

A meeting of the Directors of Chinook and District Agricultural Society will be held in the Phone Office on Saturday, July 12, at 8 p.m. Everybody welcome.

Born—To Mr. and Mrs. E. E. Jacques, on Friday, July 4, a son.

Mrs. O. Hinds, who has been visiting friends at Nakomis and Saskatoon for the past three weeks, returned Friday.

Mr. and Mrs. R. Stewart and son Harold are attending the Calgary Stampede this week.

Mrs. Robert Smith and children left on Friday for Edmonton where they will spend the summer holidays.

Mrs. Wm Lee is in receipt of word that her father, Mr. John March, of McLean, Illinois, is seriously ill. Mrs. Lee and children left for that point on Saturday morning.

Mr. and Mrs. I. W. Deman and family left by auto last Friday for Calgary. Mr. Deman expects to go on to Banff for medical treatment.

Hugh Mitchell, who has been living near Spokane, Wash., returned Saturday to spend his vacation at his home here.

Mr. and Mrs. N. F. Marcy are visitors in Calgary this week.

Mrs. John Jack and her sister Miss Sutherland visited recently at the home of Mr. and Mrs. J. W. Lawrence north of town.

C. E. Barry left on Tuesday for Calgary where he intends spending the summer.

Miss L. Ethridge spent last week with her sister Mrs. L. Foster. Miss Ethridge left for her home in Calgary on Sunday.

Mr. Jas. Rennie was in Calgary last week for a few days.

## PICNIC AT CRYSTAL

Crystal's annual picnic held last Friday was very well attended, although the rain in the morning probably kept some away who were intending to come from a distance. A long list of races of various kinds were put on and a fair number of competitors were in evidence. The horse races were exceedingly interesting, but sorry to say that one boy was badly shook up when the horse he was riding stumbled and threw him. An interesting tug-of-war was staged between the married and single men, and contrary to the usual crowning of the married men after the battle, the single men are now relating their progress. A baseball game was played between Ryerson and Sod Hall, the score being 6-3 in favor of the latter. After supper a play was put on by local talent entitled, "Way down East." The parts were very well taken and everybody enjoyed the programme immensely. The day wound up with the customary dance.

## Chinook Fair July 28-29

Preparations for the Chinook Fair held on Monday and Tuesday, July 28-29, are steadily going on and everything will be in readiness for a great two days. The whole country has promised to attend and also send exhibits. To come to Chinook on Fair day means a lot of fun and a good time in general. By taking note of the prize list and the posters you will see that there is going to be a real good time. Remember the days—Monday and Tuesday, July 28 and 29.

## M.D. of Coltholme

A meeting of the Council of the Municipal District of Coltholme was held in Coltholme School on Saturday, June 21. All members present.

The minutes of previous meeting were read and adopted.

That P. G. Hettler be allowed \$30 for moving fence from road allowance on the south side of the N.W. 1/4 of 18-28-8, w. 4.

That the Secretary be instructed to notify Messrs. T. O'Connor and O. C. Williams to remove fence from the road allowance on the south side of the N.W. quarter of 14-28-9, w. 4, and the south side of the North half of 15-28-9, w. 4, respectively and in the event of these parties failing to have the fence removed within thirty days that the Municipality take the necessary steps for their removal at the expense of the parties interested.

That the salary of the Assessor be set at \$600.

That the Union Bank be allowed priority over taxes of their crop mortgage under the Bills of Sale Amendment Act on the 1923 crop of Mr. P. Fox E. 5-26-8, w. 4.

That W. A. McLaughlin be re-appointed auditor for 1924 at a salary of \$100.

That the following bills be paid: J. C. Resler, Pound fees, \$43.10; Phones \$3.15; King's Printer \$21.40; Imperial Lumber Yards \$14.70; Attorney General \$7.50; Providence Hospital \$40.15; Western Municipal News \$34.40; Ft. Bellmont \$16.00; Western Steel Products \$317.33; Express \$15.45; Chinook Advance \$21.40; King's Printer \$5.30; J. Whalley \$11.00; Powell Equipment Co. \$48.00; S. W. Warren \$15.60; A. Stevenson \$28.00; J. M. Turnbull \$45.50; J. W. Shier \$29.00; H. Dunster \$36.00; W. D. Walter \$67.19; M. L. Chapman .75.

That we do now adjourn to meet again on Saturday, July 19.

Mr. and Mrs. D. McKenzie and family are visitors in Calgary this week.

Mr. Robert Jones, brother-in-law of Mr. W. H. Davis, who has been visiting at Butte, Mont., returned last Friday. Mr. Jones says that crops in Montana are needing rain badly.

## Canadians Return From U. S.

Nearly 9,000 Canadians have returned to Canada from the U.S. since April, according to figures prepared by the Department of Immigration at Ottawa. In April last the department instituted a system of checking at the international border on all Canadians who were returning after a period of six months or more spent in the States. The result to date has been the number above quoted.

Mr. and Mrs. L. S. Dawson family left on Sunday for Calgary where they will attend the Stampede.

## Macleod Celebrates

The fiftieth anniversary of the arrival of the Northwest Mounted Police in Western Canada, coincident with the establishment of Fort Macleod, was celebrated at Macleod the past week with immense success. Approximately 25,000 visitors from all parts of Canada and from the States visited the little Alberta town and participated in the event.

## Prince Coming Again

It has been announced by H. R. H. the Prince of Wales that he will again visit his ranch in Alberta this fall.

## The Cost Of Automobiling

There are at least 150,000 licensed automobiles in the three Prairie Provinces, and it is undoubtedly a safe and conservative estimate to place an average value of \$1,000 on these cars. This represents an approximate investment for cars alone of one hundred and fifty millions of dollars.

The purchase of a car is, however, by no means the beginning of the expense bill. In the cities and larger towns ownership of a car involves the building of a garage in which to house it, or the payment of a monthly rental for storage in a public garage. Building permits required in Western cities in recent years include thousands of permits for private garages, and the cost of these would in the aggregate provide for the erection of many residences.

Then before the car can be operated a Government license must be obtained. The cost of these varies according to size and cost of the cars, but a low average may be placed at \$15.00 per car, or a total of two and one-half millions of dollars paid to Government.

Gasoline and oils are a further requisite if a car is not to stand idle. Again striking averages it is probably not excessive to assume an average of two gallons of gasoline per car per day, say, a period 200 days in the year. Any less average consumption than this would mean that a car owner was not getting value in service for his capital investment in a car. Gasoline consumption would, therefore, amount to 300,000 gallons a day, or 60,000,000 gallons for the 200-day period, and at 25 cents per gallon, will reach the substantial total of \$2,000,000. Add oils and the bill will not fall far short of twenty-five millions of dollars for power and lubrication.

Then comes the bill, extremely difficult to estimate, for tires, repairs, recharging and replacement of batteries, and public garage services of one kind and another. Let this be placed at the low average of \$100.00 per car—some new cars will run less than this, but others will exceed it several times over in a season—and another fifteen millions of dollars is added to the total.

Still another item is that for insurance, a car against theft, fire, personal liability and property loss; also insurance against fire on the garage building. Some car owners may not protect themselves in this way, but as a strictly business proposition they should. Put insurance down at an average of \$30.00 per car, which is too low, and it comes to four and one-half millions of dollars.

These are the main cost items of automobiling in the three Prairie Provinces, but they do not include many other items too numerous to mention. They represent a formidable bill of two hundred and fifty millions of dollars, or an average of \$1,000 for every man, woman and child in this Western country.

Eliminating the original capital investment for the cars, and charging seven per cent. on the money so invested, it will be found that the annual cost of maintaining the West's large and steadily increasing fleet of motor cars is between fifty and sixty millions of dollars.

To the extent that cars are used for business purposes, and are, therefore, revenue producing for the owner, this huge expenditure in these so-called "hard times" may be justified. But it is a pretty well recognized fact that tens of thousands of these cars have been purchased and are used for pleasure purposes only.

Ownership of cars was kept in bounds and limited so long as the purchase of one was a spot cash proposition. Although even then some people were foolish enough to mortgage their homes and businesses to buy a car. But when the manufacturers adopted the policy of selling cars on time with a small cash payment down, it became a case of "keeping up with the Joneses," and everybody began doing it, making the monthly cost of upkeep of a car was all their resources could stand without also having monthly payments to meet on the purchase price.

City men use a car now instead of walking a score or so of city blocks to their offices, thus losing the exercise which their sedentary occupations make so necessary to good health and physical fitness. On the other hand, the automobile has made it possible for city people to get out into the country and to summer resorts, golf links, etc., to an extent that was formerly impossible. It has been a boon to many fathers thus enabled to take the children out for an airing. It has been an important factor, along with the rural telephone, in banishing much of the isolation and loneliness of farm life, and in times of sickness and accident has become indispensable to doctor and nurse.

## Ask Provinces To Share Pensions Cost

Government Would Pay Half Amounting to \$11,860,929 Per Annum

Old age pensions of \$20 a month to begin at the age of 70 were recommended to the House of Commons by the Special Committee on Old Age Pensions. It is estimated by the committee that the number of persons requiring to be pensioned under the plan would be 59,800, or approximately 40 per cent. of the total population of the Dominion at the age of 70. The total cost of the scheme to the Dominion is placed at \$11,860,929 per annum. This is only one-half of the pension estimated to be paid, the provinces being asked, under the plan, to provide the other half and to pay cost of administration of the act. Residence of 20 years on the part of a British subject is fixed as a condition of pension ability while aliens must be naturalized and must reside here for 25 years in order to qualify.

### A Wise Suggestion

The Mail—We often wondered, man, why you don't get rid of that piano and take the wires—look what a lot of dust! It'd save.

The idea that one of life's greatest worries is the fear of losing the job is not borne out by the leisurely way in which many people go to it.

## CHILDREN CRY FOR "CASTORIA"

A Harmless Substitute for Castor Oil, Paregoric, Drops and Soothing Syrups—No Narcotics!

Mother! Fletcher's Castoria has been in use for over 30 years to relieve babies and children of Constipation, Flatulency, Wind, Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep without opiates. The genuine has the name of J. C. Fletcher.

## The Shield Of Empire

British Special Service Squadron Last Word in Efficiency

The visit of the British special squadron at Victoria in the course of its world-encircling tour, was an event that could not fail to appeal to the pride and patriotism of every true Canadian. For it represents, not only a branch of His Majesty's service, but is everywhere exceedingly popular, but a power which did more than any other to end the last war, and which today is the most potent in preserving peace.

A foreign ambassador once declared that on the continent of Europe, when troubles threatened or disorders occurred, there was no sight more reassuring than that of the Union Jack flying at the masthead of the British Embassy or British Consulate. It was, he said, an emblem of security which the people of every country respected and appreciated.

And in time of peace, no less than in time of war, there is something comforting, even, in the appearance of a British jar. He is a type that inspires confidence and is as irresistible on land as he is at sea. Watch him at drill or in action, and you will see in him the personification of discipline, the first-class fighting man, alert, active, responsive to every command. Send him ashore on leave, and he becomes as light-hearted as a schoolboy at a picnic, the soul of gaiety and fun, getting more out of life in a limited time than any other human being, and yet "ready, aye, ready" for any emergency.

It is this combination of discipline and training with genial comradeship and sportiveness that forms one of the secrets of the British navy's strength. Whether handling a 14-inch gun or "navigating a ship of the desert"; whether rescuing people from drowning or riding a donkey will face danger, whether carrying relief to the victims of an earthquake or climbing church steeple, "Jacky" enters into the spirit of the thing with a zest that reveals the good old English spirits at its best.

The squadron commanded by Vice-Admiral Sir Frederic S. Field has just visited Australia, New Zealand and South Africa in the course of its tour, and at every port of call has received a welcome worthy of the people of an Empire which regards the navy as its surest defence. Apart from what it represents, the squadron is the last word in naval development and efficiency, being, it is said, as far in advance of the battleship squadrons of the Grand Fleet which fought at Jutland, as that fighting unit was in advance of the old Channel Fleet of Victorian days.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

## Where Murder Is Commonplace

More Than 10,000 Murders a Year in United States

The murder record of the United States has reached a point where it has aroused comment from the Americans themselves.

A newspaper statistician recently put the situation emphatically in these words:

"If these 21 hours run true to form there will be 28 American slain." That is, it seems, the daily murder score in the United States.

In other words, there are, in the neighboring republic, more than 10,000 murders a year.

But these figures account only for the murders brought to light. There must be others never reported. Then, too, of the long lists of missing persons reported, some, unquestionably, are victims of assassins.

More than that, the proportion of murders to the general population is increasing.

Twenty years ago the United States was twice as safe a country to live in. In other words, in twenty years the murder rate, in proportion to population, has doubled.—Stratford Beacon-Herald.

## Capacity Cargo For Orient

Following a four weeks lay-over in Vancouver, during which time she was thoroughly reconditioned after her months cruise around the world, the Canadian Pacific Empress of Canada resumed service on the regular trans-Pacific schedule when she left recently for Oriental ports. A capacity cargo of high-class merchandise for Japanese and Chinese markets, as well as the usual exports of flour, asbestos, lead, cigarettes and automobiles was in her hold.

## Germans Like Hockey

Hockey and cricket, played by few in Germany before the war, are gaining in popularity, but tennis continues the game most in vogue. While the number of golf players has greatly increased in the last few years, the spread of this game is hampered by the lack of ground for links. Berlin, for instance, has only two courses.

## Admit Germany To

Chamber Of Commerce

French Minister of Finance Supports Motion of Belgian Member

Germany has been admitted to membership in the International Chamber of Commerce.

The motion admitting Germany was made by one of the Belgian members and supported by Etienne Clementel, French minister of finance, on behalf of the Cabinet.

The motion was adopted by the council of the chamber unanimously. Only two conditions were made by the council on the German membership. The first one was, that German commercial interests should agree to a former resolution of the chamber respecting reparations, and second, that the Dawes report be accepted.

The German Chamber of Commerce has been organized for some time in the hope that its delegates would be admitted to the international body.

Sir Alan G. Anderson, British controller of naval construction, came from London especially to present considerations for admitting Germany immediately. He said that in this period of conciliation it would be of the first importance for financial and business men of other countries to sit on the same board with Germany and learn at first hand how the German economic interests felt.

M. Clementel in an earnest address, said that the Frenchmen could now discuss common questions with Germans face to face.

The Belgian members showed strong emotion in moving the resolution for the admission of Germany. It has been from Belgium rather than from France that the opposition to admitting Germany had come previously.

## Stomach Cramps

Yield to "Nerviline"

When doubled up at midnight with cramps you don't feel like exercising, do you? You want something to remove the cramp. Nothing acts so effectively as Nerviline. Take twenty drops in a little sweetened water, and quickly the cramp is gone. Nerviline is about five times as strong as most medicines, and because so strong, only a small dose is required to give instant effect. For stomach, gas, fermentation, cramps, Nerviline should be kept in every home. For sure protection, get "Nerviline" today. 35c at dealers.

## Discover New Sport

Rabbit Hunting On Motorcycles Becoming Popular in California

The mysterious nocturnal roar of motorcycles in the open fields of Del Rio, near San Bernardino, Cal., which for some time caused farmers the vicinity many sleepless nights, was explained recently by a youth who declared that rabbit hunting on motorcycles by night was fast becoming the popular sport of the town cyclists. He explained that riders chase the rabbits through the fields until the animals' nervous exhaustion, then drew up alongside and grabbed them by the ears.

Dust Causes Asthma. Even a little speck too small to see will lead to the attacks of asthma. The mucus of the walls of the breathing tubes contract and it seems as if the very life must pass. From this condition Dr. J. D. Kellogg's Asthma Remedy brings the user to perfect rest. It relieves the passages and normal breathing is firmly established again. Hundreds of testimonials received annually prove its effectiveness.

## United States To Assist Europe

The United States is not only willing but anxious to assist Europe in pushing the settlement of her reparations problem, but does not intend to participate in any political difficulties overseas, a spokesman for President Coolidge said, commenting on the proposed inter-allied conference in London to consider means of putting the reparations experts' plan into effect.

It clothes make the man some men must patronize mighty poor tailors.

## Using Hydrogen For

Inflating Dirigibles

British Specifications Call For Use Of Inflammable Material

In spite of frequent disasters to the rigid type of dirigible, the airship is to be given further trial by the British Government. The record of the Shenandoah, though still brief, is encouraging. The longer record of the R-34, the British craft, which visited New York a few years ago, is notable. The tragedies of the R-38 (Z-1) and the Roma do not prove that dirigible safety is impossible to attain.

The Shenandoah is inflated with helium. But that gas, while non-inflammable, has disadvantages. It is not so buoyant as hydrogen and an insuperable objection to it, from the British viewpoint, is that it is obtainable only in this continent.

The dream of a quick airship service between Australia and England, via India, Singapore and Ceylon, hardly could be realized if the precious helium had to be brought from America.

So the specifications for the two great airships authorized by the MacDonald Government are great. British call for inflation with the highly inflammable hydrogen. It is believed, however, that safeguards in the vicinity of the internal-combustion engines will reduce the risks of fire to the minimum. It is pointed out that if the gasoline vapor about the engines which has fired first, thus setting off the hydrogen. A great advantage in hydrogen is that the surplus which now is allowed to escape as the burden of the ship decreases on a long trip, through consumption of fuel and other stores, may be used for fuel for the engines themselves. This would increase the cruising range.—From the Buffalo Express.

## One Of Nature's Secrets

Here's a tree planted 204 years ago that will bear fruit again this season. Last year it yielded a bushel of pears. The tree is at Danversport, Mass. It was brought over from England by Governor John Endicott in 1630 and planted on his farm.

Why does Nature give 204 years of life to an unintelligent, relatively useless, tree—and kill off men with super-brains before they are a third as old? Is she jealous of her secrets, afraid we'll learn too much? You've noticed that the great brain usually are in weak bodies—Nature trying to destroy them.

## Million For Grain Elevator

A vote of \$1,000,000 for the construction of the government grain elevator at Edmonton, was passed in the House of Commons in committee of supply. Hon. Thomas A. Low, minister of trade and commerce, stated that the elevator would have a capacity of 2,000,000 bushels. It was hoped that it would be ready by the time the next crop was moved.

The title of doctor, is believed to have been first adopted in the 12th century.

The "bald" eagle lives chiefly on fish, dead or alive.

Minard's Liniment Heals Cuts

## Canadian Exports To U.S.

Products of Forests Helps Greatly to Boost Amount of Exports

Canadian exports to the United States for the twelve months ending with April, 1924, show an increase of something more than 48 millions of dollars over the corresponding period of 1923-24, and an example of the rapid growth in the demands of the United States upon the forest resources of the Dominion is furnished by the fact that of this 48-million increase, 31 millions come from wood and paper exports. Next to wood and paper exports, animal products are of greatest importance in Canada's exports to the United States, with agricultural and vegetable products third.

## NERVOUS DEPRESSION

Why People Are Low Spirited and Depressed

Nearly all women and most men suffer at times from fits of depression and low spirits. Everything seems a burden, then come periods of nervous irritability, headaches and weariness. People who suffer this way lack vitality because their blood is poor and nerves are starved in consequence.

The only way the nerves can be reached is through the blood. By enriching the blood with Dr. Williams' Pink Pills the starved nerves are supplied with the vital elements they need. This is proved by the experience of Mrs. J. E. Dudson, 12th Ave. east, Vancouver, B.C., who says: "About three years ago I became very weak and nervous. I had pains in my side and back, and also suffered from frequent headaches. One day I read about Dr. Williams' Pink Pills and decided to give them a trial. These pills produced such a beneficial change in a short time that I kept taking them until I had used a dozen boxes. By this time there was such an improvement in my condition that friends would ask me what I was taking, and of course I was only too pleased to tell them it was Dr. Williams' Pink Pills. I am now feeling like a new person and am doing my own housework. We would not now be without Dr. Williams' Pink Pills in the house." You can get these pills from your druggist, or by mail at 50-cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

## The Modern Girl

The most deadly foe of the girl of today is fatigue, according to Dr. Ciella Ducl Mosher, of Leland Stanford University. "The modern girl craves a short but rich life," Dr. Mosher says. "She fills her life with incessant activities and thus courts nervous bankruptcy."

W. N. U. 1632

# Only Small Percentage Of Population Of The Dominion Born Outside Of British Empire

Those who fear that Canada is becoming too heavily populated by people of foreign stock may take comfort from the Census Bureau's bulletins analyzing our population on the basis of origin and birthplace. The figures show that of 7,788,183 persons in Canada only 830,232 were born outside the British Empire, and that of these a large number came to us from the United States—people moulded in the same traditions and having much the same ideals as ourselves.

In the decade the population of the Dominion increased by 1,581,819, and the Canadian born accounted for 1,215,065, while immigration from the British Isles numbered 229,887, and natives of other British countries, 10,388. Only 137,550 came here from outside the Empire; the United States supplying 70,341 of the total. In other words, the increase of our foreign-born population in the ten years, excluding the United States, was less than 79,000.

If we continue to increase our population from the same sources as before the war—and the door was pretty wide open—there is hardly a question but that we can absorb and Canadianize the majority of foreigners that come to us. Last year we received 145,000 immigrants, of whom 72,970 were from Britain, 26,521 from the United States, and 55,120 from other countries. In 1912, when immigration was at its height, 402,482 came in—150,512 from the British Isles, 138,009 from the States and 112,831 from other countries.

It should be noted, too, that the term "other countries" includes Norway, Sweden and Denmark, from which we get a great many of our best agricultural immigrants. The Census Bureau indicates the majority of the Scandinavian settlers on farms, while Greeks, Italians and Poles (Italians) are found mostly in the cities.

If we take the large numbers of more desirable farm immigrants there remains but a small proportion of our foreign immigrants who are likely to give trouble. These are now largely grouped in "foreign quarters" in our larger cities, and we sometimes become aware of them, especially when they manifest some of the social tendencies underlying much of the evil in Europe. Yet some of the most effervescent of our so-called Reds hail from the British Isles, often from the banks of the Clyde. Certainly they are among the most intelligent. They may not perhaps sensibly treat with the same unconcern that the London policeman manifests when he gets an earful of Moscowism from the Hyde Park crowd. The "bobby" has long since learned that they are not dangerous if you let them talk.—Ottawa Journal.

## Panama Carried More Tonnage Than Suez

Of Responsible For Traffic Gain On American Waterway

The fact that the Panama Canal, though its completion is comparatively recent, carried last year—for we believe the first time in history—a larger tonnage than did the Suez Canal, the great gateway of the east, is worth noting.

In 1922, the Suez Canal handled its younger competitor, carrying 20,712,000 tons of freight to 12,992,000 tons passing through the Panama waterway.

In 1923, however, the Panama tonnage reached 27,237,000 tons, or nearly double that of the preceding year, while the Suez Canal carried 22,720,000 tons of freight. The difference may be comparatively slight; but it was sufficient to put Panama ahead.

Why the pronounced gain in tonnage?—Oil—which in recent years has caused so much furor—is understood to be responsible. The water route from California is given as the chief factor in the enormous traffic gain on the American waterway.

What Newspaper Convention

Intimating that it was expected Winnipeg would be selected by the board of directors of the Canadian Weekly Newspapers Association, which meets in January, as the city in which its 1925 convention would be held, Premier John Bracken has received a communication from E. Roy Slayes, manager, Manitoba extended an invitation to the association in a telegram sent while the convention was in session recently in Toronto, which was strongly supported by the western members.—Free Press.

The Question's Solved

Comely Maiden.—Why are all ye-alls spoken of as "she"?—Because they glide so gracefully, I suppose.

Boatman.—No, miss it ain't, it's because their "riggins" costs so much.

## Railway Rivalry In Efficiency

Country Benefits Generally From Healthy Rivalry Between Two Great Roads

Not so long ago Canadian railway time tables were honored in the breach. The improvement in the running of passenger trains on the Canadian National Railway and its predecessors is most marked because formerly the practice was particularly bad. Daily the Trans-Canada train of the Canadian Pacific pulls in to Ottawa on the dot at 10.55 a.m. and travellers all the way from Vancouver are able to get their watches at every divisional point by the printed time table. Canadians travelling on this train have reason to be proud of the equipment, the train crews, and the machinery that keeps the track clear.

The country generally must benefit greatly from the healthy rivalry in efficiency that is now being carried on between its two great railways, one publicly and the other privately owned. Both incidentally are striving to develop the foreign tourist trade which brought scores of millions of dollars into Canada last year without going beyond the fringe of the gold mine that waits to be tapped; and the train and hotel service that both are giving makes greatly to that end. The C.P.R. has for years been noted for the splendid esprit de corps of its staff, and travellers are noting with satisfaction that Sir Henry Thornton and his aids are meeting with much success in the same direction on other railway.—From the Ottawa Journal.

## The Tragedy of the Treeless Town

By Archibald Mitchell, of the Canadian Forestry Association

The other side of the picture is the treeless town—the carefree, slipshod huddle of houses where nothing matters but the making of money—where the human and the tree are not to be seen sleeping, with no pleasurable associations to bind their inmates with love of the green, growing things they cherished in childhood and in after life. Children—leaving such a town to go out into the world, feel no pang of parting from the trees they planted with their chubby hands. They, poor things, have never planted a tree. They have no affectionate longing, in after life, to again see the dear, gnarled maple whose tapping at their bedroom window welcomed their arising from childhood's slumber to blink happily at the mottled sunlight dancing through the interstices of the shinning foliage.

Trees, flowers, green grass—they bind the inmates to the house they call home. There, in the corner of the lawn, is mother's tree. Its blossoms were ever the finest and sweetest in the garden. Down by the gate is the sturdy fir that dated that day in the Easter holiday, or long ago, when you helped him. The dog the hole—you held the tree straight while dad carefully packed the brown earth about its roots. Dad and mother have long since gone the way of all flesh. But the trees they loved remain to link you up to the memory of other days when an uninvited family sat at tea beneath their comforting shade. Dad's trees, mother's tree—blessed, unspurring, living tree-monuments to revered memories!

Black Bass For Saskatchewan Lakes

The fishery hatched at Qu'Appelle are now engaged in the breeding season. The Ontario Black Bass and it is hoped to secure the cooperation of anglers in properly stocking the waters of Saskatchewan with these game fish as the fry becomes available. An attempt is also to be made to stock small lakes that are at present barren of fish life, with perch.

University In Africa

The British Government has agreed to a scheme inaugurated by the Governor of the Gold Coast, West Africa, for the construction of a large university college near Accra, the capital of the colony. The chief purpose of this university is given as being for the education of Africans desiring to enter any profession, without the necessity of going to Europe.

Has One Advantage

An electric machine that lays as many bricks as 20 bricklayers is being marketed to the building trades—a feature of it being that it doesn't have to stop every few minutes to light its pipe.—Hamilton Herald.

And Suffered More

Just what it's outrageous! I merely criticized the biscuits Helen made and she hit me with one of them.

His Ma-in-Law.—Foolish boy you got off easy. Her father ate one of my first batch.

## New Industry For Vancouver Island

Only Place in Canada Where Bulbs May Be Grown Commercially

Vancouver Island is practically the only place in Canada where bulbs may be grown commercially. It may be that a few other locations on the mainland of British Columbia may be suited to bulb culture, but they are not yet commercially grown.

Practically all of the bulbs grown in Canada come from Europe, where they have been grown for many years, and are put on our market at a low price. Recently disease has developed in the imported stuff to such an extent that it has been thought wise to practically prohibit further importation. This should give to the coast every advantage, and the bulb industry should develop as it has not done heretofore. A few gardeners have known for a long time that Vancouver Island bulbs are superior to others, but to convince America of that fact is no small matter.

Attempting to demonstrate all over the country the superiority of the bulbs grown here, the Experimental Station at Sidney, B.C., sent some quantity of tulips grown there to all other experimental farms and stations in Canada. It was asked that these Vancouver Island bulbs should be grown beside the best of the imported stock. Certain questions were asked the superintendent covering this work for the season. In the replies received from the superintendents it was evident that the Vancouver Island stock has shown its superiority. There is no reason why this industry should not be developed into one of distinct worth to the island.

Canada may not have been able in the past to compete with the cheaper labor of Europe, but that matter is rapidly adjusting itself, for labor is no longer cheap in the Old Land, and besides, unfair competition in this respect has been practically ended.

## Opinion Of Editors

Writes From the East Think Western

Canada is at all right, and it is off to a fine start for another splendid crop of the prosperity making kind," according to the consensus of opinion of the important group of Canadian newspaper publishers and editors after a tour of the west that included a visit to every Canadian city as far west as Victoria. The party included the members of the Canadian Daily Newspaper Association and the Canadian Press Limited, and nearly all the daily newspapers of the country were represented at the annual meetings of the two organizations held in Vancouver. The party had unusual opportunities to gather first-hand information and they are unanimous in stating that given favorable weather from now on, the west is assured of a wheat crop that may be equal to that of last year. They state also that they observed throughout the country a feeling of confidence in the future such as was not everywhere to be met with a year or two ago. All along the line they were impressed with the need for immigration and they report that the demand for farm labor is already arising in practically every settled district.

## Saskatchewan—Farm Stock

Total Value of Livestock in Province Is Given As \$19,240,900

The total value of farm livestock in the province of Saskatchewan is placed at \$19,240,900, according to the latest report of the provincial department of agriculture. Since the year 1906 the number of horses in the province has increased from 210,666 to 1,152,409; Milch cows from 126,818 to 456,006; other cattle from 472,254 to 1,046,780; all cattle from 472,254 to 1,522,785; sheep from 121,290 to 1,937; and swine from 123,916 to 363,669.

## Activity At Rice Lake

It is reported that there are no less than 200 prospectors working in the Rice Lake mineral district this year, and that the total number of men engaged in mining activities is not less than 900. The Rice Lake district is what is known as the Southeastern Manitoba mineral area and lies east of Lake Winnipeg and north of the Winnipeg River.

## Savings Deposits Increase

Deposits in the Ontario provincial savings bank have doubled in the last twelve months, increasing from approximately \$10,000,000 to \$20,000,000 in the year, according to an important announcement made by Treasurer Price.

## Her Mistake

Usher.—Lady, I think you have wronged me. May I see your stilet? Lady (sneakily).—Young man, I want you to understand I do not smoke.

In Los Angeles, a plumber collected a bill blue years old, proving they don't forget everything.

## Foot and Mouth Disease

Great Precautions Necessary For Protection of Livestock Raisers

Outbreaks of foot and mouth disease, probably the most infectious malady of animals, have never occurred in Canada.

The disease has caused tremendous losses to the agricultural industry in other countries. There is no permanent cure for it. While it is essentially a disease of cattle, sheep, swine and goats, all ruminant animals are susceptible. Horses, dogs, cats and even poultry have been victims. Man may also become infected and children frequently suffer through drinking raw milk from infected cattle.

The British authorities have been endeavoring at a cost of millions of pounds to eradicate the infection of this disease in that country for over two years, and those of the United States are similarly engaged in the State of California, where it was recently introduced from foreign countries through the port of San Francisco.

The Canadian federal department of agriculture, with a view to protecting livestock interests, are enforcing the most stringent regulations which cover the species of animals and commodities that are likely to carry the infection of the disease.

If livestock owners should have reason to suspect the existence of this disease in Canada, it is of the utmost importance that they notify the nearest veterinary inspector and telegraph collect to the Veterinary Director General at Ottawa.

In the meantime they should tie their dogs and not permit anything to leave their premises. Prompt control measures and the willing and intelligent cooperation of the stockmen are essential to prevent disastrous results. If the infection of this disease gains entrance to Canada, everyone should remember, however, that prevention is better than control.

## Coal Discovery

Seam of Lignite Coal Is Found Near Lawson

A seam of lignite coal 15 feet in thickness has been found on the farm of J. A. Mitchell, a couple of miles from the town of Lawson on the Moose Jaw-Regina branch of the Canadian National Railway. W. H. Hastings, mining engineer of the department of industries, Saskatchewan, who has made an examination of the deposit, states that the coal appears to be a good average grade of lignite. At the point where the coal was tapped in the process of shaling a well the overburden is only 11 feet. Mr. Hastings' recommendations that the government undertake to do a limited amount of drilling in the area, sufficient to determine if the seam has any considerable lateral extent and also to ascertain if there are deeper seams below the one in question. The Canadian National Railway passes close to the locality where the coal was found.

If this coal proves to be as good a quality as thought, a mining industry will undoubtedly be developed at Lawson, owing to the proximity of such good markets as the cities of Moose Jaw and Regina, also other towns in that part of Saskatchewan. To say nothing of the demand there would be from the farming communities in that well settled section of the province. Biverhills is 60 miles north of Moose Jaw and this is the furthest north that such a large seam of coal has yet been found in the settled areas of Saskatchewan.

## Storing Eggs

Storage Eggs Should Be Placed in the Case With the Small End Down

When packing eggs to be stored for next winter's use, it is important to place the eggs in the case with the small end down. Unless this is done the yolks have a tendency to drop to the bottom of the egg and stick to the shell, which causes them to grade as "seconds." The Dominion Poultry Husbandman, to determine the difference in storing eggs in the two ways, carried out an experiment for a period of six months, with five dozen eggs in each case that were kept in a properly controlled cold storage. When the eggs were brought out, those standing on the small ends graded 193 "extras" and 67 "firsts," whereas those resting on the large ends showed only 42 "extras" and 59 "firsts," while there were 30 eggs with yolks resting on the bottom and 7 were weak and watery. A small number of cracked eggs made up the balance. This information is contained in the report of the Dominion Poultry Husbandman for 1923.

New Product From Western Canada

What is commercially and medicinally known as Epsom salts is now being produced in Western Canada in commercial quantities. To the mining man this product is known as magnesium sulphate, and as such has been mined at several points in British Columbia.

# Bird Protection In Canada Is Of Utmost Importance And Of Vital Concern To Farmers

Conservative estimates place the annual loss of the Dominion through the destruction by insects of growing crops at \$100,000,000 or more, which sum could be materially reduced if birds are present in any given locality in sufficient numbers to prevent the excessive increase of those insect pests on which they live to a large extent.

As this loss is mainly sustained by farmers, they should be the greatest exponents of the protection of Canada's bird-life, but unfortunately many of them are not fully informed on the advantages to be derived by having birds around the farm. In the work of improvements or drifting of swamp lands, many of the birds' best feeding grounds are unintentionally destroyed. It has been frequently said that birds destroy the crops, but abundant evidence has been gathered by reliable authorities to show that the majority of birds only injure the crops when their natural food is lacking.

It is only within the last decade that an active, organized campaign has been carried out to protect bird-life in Canada. Many individuals and societies have been interested in this work; but it was not until 1917, when the Migratory Birds Act was passed by the Federal Parliament, that operations were carried on as a business-like basis.

Among other things, this act provides for the establishment of bird sanctuaries, and to date reserves have been set aside in practically all provinces of the Dominion. Among the more notable, operated by and in conjunction with the Dominion Parks Branch, are the sanctuaries at Percé, Bird Rock in the Mingan Islands, and portions of Bonaventure Island, off the Gaspé Coast, in the province of Quebec; Jack Mine's farm and the municipal park at Niagara Falls, in Ontario; Last Mountain Lake, in Saskatchewan; Rideau Island and Lake Nevelin, in Alberta. The killing or hunting of birds in these game reserves is prohibited by law.

From time to time various objections have been made against the establishment of sanctuaries, but the necessity and desirability of setting aside breeding grounds is now generally recognized by sportsmen, and there are many others who are not aware of the importance of protecting Canada's birds, some of which are rapidly becoming extinct.

In order to educate the public to the need of protection for birds, the Dominion Government has under way an extensive educational programme which will undoubtedly do much to dispel the misconceptions regarding bird-life in Canada. To date over 100,000 pamphlets have been issued on bird protection, one of which, "Lessons in Bird Protection," has been authorized for use in every school in Canada. Posters also have been issued concerning the shooting seasons and bird protection matters. In addition, numerous lectures have been made before schools and other public bodies interested in this subject. In connection with the latter, motion pictures and lantern slides have been shown.

Another phase of educational work which has been of valuable assistance in this work is the encouragement of birdhouse building. During the past two or three years birdhouse competitions have been organized in various school districts. In Ottawa and some of the larger cities, the manual training teachers have directed the boys in the building and designing of bird houses, and several hundred bird dwellings have been built this spring in the city of Ottawa alone. In addition a number of bird houses have been made and erected in some of the national parks.

Among the private organizations interested in bird protection is the province of Quebec Society for the Protection of Birds, which was organized in Montreal in 1917 shortly after the Migratory Birds Act was passed. This association has been particularly active in Quebec in disseminating information regarding birds and has been instrumental in promoting numerous educational programmes designed to further the protection of bird-life in Canada.

In the prosecution of this work it has been necessary at all times to have the co-operation of the United States authorities, and an agreement has been entered into by the two governments for the protection of migratory birds. This pact has worked out very satisfactorily, and on each side of the border have been particularly vigilant in protecting the birds during their annual migrations. The work already done in protecting birds by the Federal Government, societies and individuals has been of much importance, and it is hoped that the next few years will see a gradual

If not rapid, increase in the number of Canada's birds. They are not only valuable from an aesthetic, but from an economic standpoint.

## Tree Planting Car

Keen Interest Being Aroused Everywhere In Prairie Communities

To make the west still more beautiful, to better farming conditions from the economic standpoint, and cover the prairies with permanent and attractive homes, is the great mission that is carrying the Tree Planting Car of the Canadian Forestry Association over the western prairies. Its remarkable success is being attested by the keen interest aroused everywhere among prairie communities and by the hundreds of requests that are pouring in for the further services of the car.

The lecturers and demonstrators in charge of the car are tackling the problem of a more stabilized population at its very root, viz., by tree cultivation, inducing action by holding public meetings of settlers, through the medium of movie pictures, radio addresses, enlisting the aid of the press, of community clubs and boards of trade, and by practical outdoor demonstration in planting and pruning.

Scores of municipalities have been started on the way to park and highway planting with the necessary blue-print plans and working data and definite boosting given the cause of successful agriculture and permanent homes.

The Tree Planting Car's practical form of assistance is a vital factor in the lives of thousands of settlers. Very considerable numbers have been coming into the immense areas of Manitoba, Saskatchewan and Alberta each season, many of them unacquainted with the best farming practices and any real knowledge of horticulture and tree planting problems. Owing also to peculiar climatic conditions only certain varieties of trees can be expected to survive, and naturally under the conditions the majority of plantations set out by the newcomers were doomed to be failures.

It is just here that the expert advice of the Canadian Forestry Association Car proves of value. It is shown to the settler how to choose the right varieties of trees, how to plant his windbreaks for protection to man and beast; the right species to select, and how to care for it afterwards, properly. The settler has all the evidence around him that trees make the place home-like in summer, hold back the drifting snows of winter, protect the buildings from driving storms, shelter gardens, attract singing birds, increase the value of the land, conserve the all-important rainfall, and by turning the bare prairie into cozy and artistic homes, bring contentment into the lives of the farmer and his family.

## World's Largest Inland Port

Montreal the Largest Inland Port in the World

Remarkable growth in all branches of port activities is evidenced in the annual report of the harbor commissioners of Montreal, covering the navigation season of 1922. Montreal is the largest inland port in the world and one of the principal ports in North America.

The report states that wheat exported through the port in that year totaled 89,566,603 bushels, against 83,266,612 in 1922. The grand totals for grain were 120,167,980 bushels received, and 119,940,129 delivered out. The total number of ocean-going boats trading to the port in 1922 was 1,117, with a net tonnage of 7,728,719 against 1,191 ships of 3,522,631 tons in 1922. Inland vessels were 5,669 with a net tonnage of 8,195,208.

There has been immense expansion in grain handling facilities. Elevator "B" with a capacity of a million bushels and a storage house of 1,150,000 bushels capacity was acquired in 1922. Also there has been the construction of elevator number three, which will be ready for operation this year, and has a rated capacity of 2,000,000 bushels. Total capacity of all elevators in operation at the beginning of the navigation season was 12,162,000 bushels. Total capital expenditure on the port during 1922 was \$3,837,516.25, and total expenditure on the port to the end of 1923 amounts to \$29,106,251.23.

## Such a Good Woman

Ant.—(talking scandal.)—Mrs. Maslowsky? Oh, surely not! She is an awfully good woman; so devout.

Niece.—But she flirts outrageously.

Ant.—Yes, but only with the clergy.

A spider's line is only the 30,000th of an inch in diameter.

## SENATE GIVES THE HOIST TO BRANCH LINES

Ottawa.—Five Canadian National branch line bills were killed in the Senate. Four of the lines are in Saskatchewan; the fifth is in Nova Scotia. The four Saskatchewan lines are: Turfbluff to near Hartford, Lloydminster westerly 45 miles.

From Radville, Beagouh or Ritchie, From Nipawin northerly.

The first three were killed either by formal motion to hold or by non-approval of the preamble. The fourth was killed by concurrence in a report from the Senate railway committee, that construction of the line is "not expedient." The Nova Scotia line from Sunnybrae to Gaysboro was killed in the same manner.

Three Alberta lines received third reading—a joint section from Rosedale, westerly, between Hanna and Warden.

It was a day of sharp debate. Sir James Loughheed, Conservative leader, charged the Canadian National with an orgy of extravagance. No matter what ramification of the road was looked into, he declared, the imprint of the grossest extravagance would be found stamped upon it. He spoke of officials of the road "sipping in hotels with the ambrosial nectar of the gods."

Sir James Loughheed's motion for a six months' hold of the Turfbluff branch carried by 45 to 24.

Third reading was given the bill authorizing the Rosedale branch in Saskatchewan.

The Hanna branch in Alberta and the Loretta branch in Saskatchewan were also given third reading.

The Lloydminster branch in Saskatchewan was given a three months' hold on motion of Sir James Loughheed and Senator Robertson.

The vote was 47 to 23. In opposing the Loughheed amendment, Senator Dandur maintained that if the Lloydminster branch was good proposition for the C.N.R. it was good for the C.N.R. That was the best evidence, he thought, that the territory was a paying one. He pointed out that this bill had been discussed in committee, that it should be reported favorably and this attack from the blue on the floor of the chamber savored of star chamber methods.

Defence of the proposed line came from Senator Griesbach who pointed out that pioneer railway lines had gone far toward settling the country. Senator Robertson declared that his chief criticism of C.N.R. executive officials was that they came before the committee and gave him the impression that they had no confidence in the paying possibilities of the line they endorsed.

"It is not a question of C.P.R. versus C.N.R.," said Senator Robertson, "but it is a question of whether we are going to build a railway line to every man's granary. If the C.N.R. proposes to do that the Lord help it."

In moving for the non-acceptance of the preamble of the bill for the Radville line, Senator Robertson said that it would be a great mistake to build this line. There had been a change in the plan since last year.

Senator Wiloughby argued that the settlers in the district through which the branch would run were vitally in need of railway transportation.

Sensor Calder declared that the attitude toward the branch line programme was a wrong one. The "C.N.R. could only be made to pay in one way, and that by building and encouraging the settlement and development of the country. The elimination of the branch lines was strangely strangling the C.N.R."

Sensor Laird also supported the bill, but the preamble was not approved on a division of 50 to 20.

Cowboy Killed At Stampede MacLeod, Alta.—Charles King, of Canadale, Alta., who was kicked in the head while attempting to ride a bucking horse called Death's Head at the Stampede here, died without regaining consciousness. His skull was fractured. King was 27 years old, and was born in Oxfordshire, England. He came to Canada in 1906.

Teachers Go To Europe Winnipeg, Man.—One hundred school teachers from four prairie provinces entrained here for Montreal to join the annual tour of the Overseas Educational League, in which they will spend five or six weeks in Great Britain, France and Belgium, returning to Montreal from Cherbourg, August 21.

Facilities C.N.R. Financing Ottawa.—Third reading was given in the Senate to the bill authorizing the Canadian National Railways to issue bonds for 75 per cent. of the cost of equipment when Parliament had authorized 25 per cent. of the cost.

W. N. U. 1532

## Did Not Advise On Canadian Naval Policy

Vancouver.—When the attention of Vice-Admiral Sir Frederick Field to questions asked in the House of Commons at Ottawa, criticizing a statement purported to have been made in Victoria by the commander of the British special service squadron to the effect that Canada should equip four cruisers, Admiral Field categorically denied that he had made any such observation nor made specific reference as to what Canadian naval policy should be.

## Establish New Record For Prize Winning

Alberta Breeders Carry Off Premier Awards At Brandon

Brandon.—Sweeping before them all the premier awards in one of the strongest fields of Hereford cattle, O. G. Boggs and Sons, of Dayland, Alberta, established a new record for prize winning at the Brandon fair. These leading Alberta breeders carried off the senior and grand junior, and reserve grand championships, for both males and females in the Hereford classes. It is the first time in the history of the exhibition that any one exhibitor has achieved such a success in any breed. M. Alsager, of Leighton, Alta., also made a splendid showing in the Hereford division.

In the Anglior classes, which were not represented as well as the former years, Morrison and Sons, of Fairlight, Sask., and R. R. Ness and Sons, of Hovick, Que., shared honors. Henry Thompson, also of Fairlight, was well to the fore in the Jersey breed, while G. M. Read, of Stony Beach, Sask., figured among the prize winners.

Western exhibitors were well represented in the different classes for sheep. Prof. J. P. Skaville, of the University of Alberta, who is placing the awards, expressed himself as greatly pleased with the high quality of the exhibits.

## Soldier Returns Gratuity

Came Back to Old Job and Did Not Need Money

Bridgeburg, Ont.—A former soldier in the Canadian Mounted Rifles, Alfred H. Lewis, 27 years old, a butler employed in Buffalo, has surrendered the \$500 gratuity and pension he received five years ago to Rev. Canon D. Russell-Smith, rector of St. Paul's Church, Fort Erie, to be used for the benefit of any of his comrades and other persons in distress.

"The money was given me to help me back to civilian life, but it was easy for me, too, I came right back to my old job. I have had no need for it and my conscience would not glow me to keep it any longer. I want it for the purpose it was intended," Lewis said.

## Wants British Goodwill

South Africa's New Premier Declares Loyalty to Empire

Pretoria.—"Great Britain should, and always will be, as far as my government is concerned, the first and chief friend of South Africa," declared Premier Hertzog, leader of the newly formed National-Labor Government at a Nationalist banquet here.

Unfortunately, in the past, there had been accusations made against the Nationalists, because they insisted upon the doctrine of South Africa first, but many of those who accused them were now with them on this point, he said. It always would be the aim of the Nationalists and his government to co-operate with Britain and to do so heartily with the rest of the Dominions.

## Loss Of Lake Louise Chateau

Famous Palace in the Clouds Falls Prey to Flames

Lake Louise, Alta.—Two fire-blackened walls and a heap of smouldering debris is all that remains of the original Lake Louise Chateau, the famous "house in the clouds." Fire which broke out in the main kitchen Thursday noon razed the whole structure to the ground, and was checked only when the concrete walls and the steel fire doors of the new wing of the Chateau were reached.

It was stated that the loss will reach nearly \$250,000. The thought to have originated through an over-heated stove in the kitchen. The building and contents outside the guests' belongings, were fully covered by insurance.

Authorized To Borrow \$300,000,000 Ottawa.—In the House of Commons a bill authorizing the Dominion Government to borrow three hundred million dollars to meet maturing obligations, was given first reading. Four resolutions confirming international agreements regarding employment at sea, were passed in bills based on them given first reading.

## Bryan Supports McAdoo

New High Mark Reached In Forty-Second Ballot

Madison Square Gardens, N.Y.—William Gibbs McAdoo ran to a new high mark in the forty-second ballot in the Democratic national convention. He passed the much-sought goal of 500 votes by dint of much frantic work and persuasion and maneuvering on the part of his floor managers, who declared they had not finished their work yet.

Turning close to the 46 and 44 ballot record of the Baltimore and San Francisco convention, respectively, the New York exhibition gave promise of setting a new mark. McAdoo hit his high mark so far in the fortieth ballot, when he polled 505½ votes. Smith at that time had dropped a little below his high level, 323½, close on previous ballots. At the close of the thirtieth ballot McAdoo had stood at 415½ votes. Thus he gained nearly a hundred in the balloting and the votes he got were taken principally from John W. Davis who fell to 70 on the last ballot.

The feature of the session came when William Jennings Bryan, war horse of many campaigns, took the platform and declared himself for McAdoo. He declared the Democratic candidate must be firmly for prohibition.

## NO EMERGENCY LEGISLATION FOR RURAL CREDITS

Ottawa.—A report against emergency legislation, this year in regard to rural credits was presented to the Commons banking committee by Dr. Matthew McKay, Liberal, North Bay, chairman of the sub-committee on rural credits.

The report stated that any plans adopted should apply to all provinces and it would not be possible to create money this year and that, therefore, attention should be concentrated on the drafting of a permanent rural credit scheme.

Dr. McKay also presented a report recommending amendments to the Bankruptcy Act to provide that in provinces having a provincial officer analogous to a bankruptcy trustee, such officer may act as trustee under the Bankruptcy Act where the insolvent is a farmer.

The committee took up the proposal of H. E. Spencer (Progressive, Battle River) that the Bank Act be amended to provide that the entire cash circulation redemption fund be used for the redemption of the notes of defunct banks; and that other banks should be able to recover their contributions to the circulation fund from the defunct bank's assets only after all other liabilities had been paid.

H. T. Ross, secretary of the Canadian Bankers' Association, said the existing fund had proved a sufficient insurance. There had been no losses.

There was a long discussion and W. D. Euler, Liberal, Waterloo, asked Mr. Ross if under the Bank Act the Bankers' Association had any right to inquire into the condition of an individual bank.

Mr. Ross replied in the negative. Hon. T. A. Crerar opposed the amendment but thought all notes should be issued by the government. On a recorded vote, the Spencer amendment was defeated, 33 to 20.

Hon. J. A. Robb voted against the amendment.

L. J. Ladner, Conservative, South Vancouver, dropped his proposal to abolish the double liability of shareholders.

Votes For "Beer By the Glass" In B.C. Victoria, B.C.—Official election figures released by the Provincial Secretary's Department indicate that at least thirteen ridings have voted in favor of beer by the glass. They are: Alberni, Atlin, Cariboo, Columbia, Esquimalt, Fernie, Fort George, The Islands, Nanaimo, Omineca, Prince Rupert, Rossland, Trail, Skeena and Yale.

The vote in Durnaby and Creston is a tie.

National War Memorial Unveiled St. John's, Newfoundland.—July 15, Newfoundland's annual day of commemoration of the supreme sacrifice made by her sons on land and sea during the Great War, was signalled by the unveiling of the national war memorial at St. John's by Earl Haig.

The ceremony took place before a gathering estimated to number 20,000 and was staged under ideal weather conditions.

Crops Look Fine Regina.—C.P.R. officials, returning from a trip over the Colquhoun, Kelsey and Indian Head sub-divisions, report that crops are in excellent condition and growing very fast. Wheat is so well rooted that it can stand considerable hot sun without damage, they report.

## U. S. Presidential Nominations

W. G. McAdoo, who reached high mark at Democratic National Convention.

## Claim Home Bank Not Legally Incorporated

Solicitors For Shareholders Prepare Defence on Double Liability

Toronto.—James W. Bain, K.C., and John G. O'Donoghue, K.C., counsel and solicitor, respectively, for the shareholders of the Home Bank of Canada, from whom the liquidator seeks to recover "double liability," have prepared their statement of defence. They claim that the Home Bank of Canada had not any legal right or power to issue, or dispose of, shares of its capital stock because it was never, at any time, a chartered bank duly and legally incorporated under and by virtue of the banking acts and laws of Canada. They say that the defendants never, at any time, agreed to purchase shares of the Home Bank with terms and conditions attached that in case of the insolvency of the bank they would be called upon to pay double liability.

The matter, they say, was never brought to their attention, and, therefore, they claim the provisions of the Bank Act of Canada do not apply to them.

## Says U. S. Oil Resources Are Near Depletion

Fuel Problems Discussed At Conference By British Expert

London.—Sir Richard Rodmayne, noted British mining expert, told the International Power conference that the oil resources of the United States would be exhausted within 2,000 years. The coal of the British Empire would be gone within a few centuries, he declared, and attention should be directed to utilizing the potential energy in fuel to the best effect so as to conserve the world's supply. A low temperature of carbonization in coal being an important step in this direction.

## Resent New Dominion Law

Chinese In Victoria Bitterly Incensed Over Registration Rule

Victoria.—Chinese residents of Victoria held a series of mass meetings and were specially designed tags on coat lapels July 1, expressing their protest against the new Dominion law requiring all Chinese in Canada to register. Speakers at the meetings declared that when China managed to solve her present problems and form a strong government it would inevitably retaliate against Canada. The enforced registration was bitterly resented by all Chinese, they said. Apart from the meetings there was no demonstration.

Cannot Copy U.S. Trade Marks

Ottawa.—The right of a Canadian company to copy and register in Canada trade marks already in use in the United States is denied by Mr. Justice A. K. MacLean, of the Exchequer Court of Canada, in a judgment rendered here.

Study Taxation Methods Ottawa.—The government has announced its intentions of bringing down legislation for the establishment of a board to investigate and study various modes of taxation to improve the existing system.

## Prince Will Probably Visit Ranch In October

Calgary.—"So far as we know, no particular plans will be made for the visit of His Royal Highness," said Professor W. L. Carlyle, manager of the E.P. Ranch. "It is probable that the Prince will make a quiet visit, just as he did last year. We did not know that he was coming but we are delighted by the announcement." Professor Carlyle did not know when the Prince was coming, but assumed that the visit would probably take place in October.

## Approve Germany's Entry Into League

International Federation Thinks It Best Solution of Reparations Problem

Lyons, France.—Subject to final acceptance of the entry report, the International Federation of League of Nations Societies meeting here, approved the recommendation of the Economic Commission, favoring the expert reparations report, calling for Germany's entrance into the League of Nations with a permanent seat in the council and expressing the conviction that the mechanism of the league afforded the best channel, and the best guarantee, of a satisfactory solution of the reparations problem.

In a telegram to the Congress, Premier Herriot of France said: "Travelling wounded in the course of repair, asks only just reparation for the damage she has suffered, but once that result has been obtained, she will be faithful to her democratic traditions and have no greater preoccupation than to contribute with all her force to the organization of a sincere and lasting peace between the nations."

## FAVOR A SINGLE SELLING AGENCY FOR WHEAT POOL

Brandon, Man.—Resolutions supporting the formation of an international selling agency to handle wheat in the three prairie provinces, and fully empowering the directors to proceed with the creation of a selling agency were passed at the first annual meeting of the shareholders of the Manitoba Wheat Pool here.

A bylaw providing that the president and vice-president be elected from among the board of directors, and that the secretary-treasurer be appointed by the board, was adopted. Seven members will make up the board.

The arrangement made with the mortgage companies in connection with wheat pledged to the pool by their tenants was explained by J. Murray, of Winnipeg, counsel for the pool. This arrangement is one by which the tenants of the mortgage companies are enabled by the co-operation of the companies to market through the pool not only their own wheat, but the wheat of the companies.

## The Cry Of The Children

The Crime of Exploiting Young Children For Profit  
(By Dr. J. G. Shearer)

One of the subjects seriously discussed at the Great Parliament of Social Work, Toronto, was Child Labor in the Southern States. Cotton Mills numbers of young children are exploited for profit. Many parents are willing they should be. The 18 American states are presently to vote on the ratification of the 29th Amendment to the Constitution giving the Federal Government control over child labor. Canada is not without child labor, though there is in proportion less than in some other lands. There is some in factories, on the streets and even on the farms. Let us read again and yet again the following melting appeal in their behalf by Elizabeth Barrett Browning:

"Do you hear the children weeping, O my brothers,  
Hear the sorrow comes with years?  
They are leaning their young heads  
Against their mothers,  
And that cannot stop their tears.  
The young lambs are bleating in the meadows;  
The young birds are chirping in their nest;  
The young fawns are playing with the shadows;  
The young flowers are blowing toward the west—  
But the young children, O my brothers,  
They are weeping bitterly;  
They are weeping in the playtime of the others.

In the country of the free,  
They look up with their pale and sunken faces,  
And their looks are sad to see,  
For the man's hoary anguish draws and presses  
Down the cheeks of infancy—  
Go out, children, from the mine and from the city,  
Sing out, children, as the little thrushes do—  
Puck your handfuls of the meadow-cowslips pretty—  
Laugh aloud, to feel your fingers let them through!  
But they answer, 'Are your cowslips of the meadows  
Like our weeds among the mine?  
Leave us quiet in the dark of the coal-shadows,  
From your pleasures fair and fine!  
'For oh,' say the children, 'we are weary,  
And we cannot run or leap—  
If we cared for any meadows, it were merely  
To drop down in them and sleep.  
Our knees tremble early in the stooping—  
We fall upon our faces, trying to go;  
And, underneath our heavy eyelids—  
drooping,  
The reddest flower would look as pale as snow,  
For, all day, we drag our burden  
Through the cool-dark underground,  
Or, all day, we drive the wheels of iron  
In the factories, round and round.'  
Still, all day, the iron wheels go on—ward,  
Grinding life down from its Maker;  
And the children's souls, which God is calling upward,  
Spin on blindly in the dark.  
They know the grief of man, without his wisdom;  
They sink in man's despair, without its calm—  
Are slaves, without the liberty of Christendom,  
Are martyrs, by the pang without the pain—  
And worn as if with age, yet unreluctingly  
The harvest of its memories cannot reap—  
Are orphans of the earthly love and heavenly;  
Let them weep! Let them weep!  
They look up, with their pale and sunken faces,  
And their look is dread to see,  
For they mind you of their angels in high places.

With eyes turned on Deity:  
'How long,' they say, 'how long, O cruel nation  
Will you stand, to mock the world on a child's heart—  
Strike down with a mailed heel its palpitation;  
And feed onward to your throne amid the mire?  
'Our blood-splashed upward, O gold-hooper,  
And your people shoot your path;  
But the child's soul in the silence curses deeper  
Than the strong man in his wrath!'

Not improbable  
Judge—This man says after he fired a shot he saw you run from his chicken coop.  
Rastus Johnson—He could easily be mistaken, Judge. Fast as Ah was runnin' it might have been someone else what satly resembles me.

W. N. U. 1532

## Adopting American Custom

German University Students Help Put Themselves Through

The self-help student, unknown in Germany before the war, is increasing in the universities because of existing economic conditions. It is estimated that one-half of the student body of the country receives less than \$15 a month each from home, so that the American custom of part-earning by college students became a necessity. The universities and allied organizations have taken keen interest in the matter, establishing employment bureaus, book stores, handouts, printing shops and even small factories where students are employed in off hours. The usual pay is one meal for an hour of work.

At Goettingen University, for instance, 1,000 students earn their noon meal and about 500 their supper by manual and clerical work. One effect is said to be the gradual disappearance of the old-time student sloth and attitude of superiority toward the town folk.

## A Superior Race

The American round-the-world aviators left the water near a Russian island and were promptly told they must not land because Russia and the United States had no treaty arrangements, and yet when the Americans landed in Japan they were overwhelmed by kindness, notwithstanding the fact that Japan has a real quarrel with America over immigration. The Japs are a superior people to the Russian Reds—St. Catharines Standard.

Environment is an important thing in life. Flour and water in a china pitcher is cream sauce; in a pail on the sidewalk it is bilgewater's paste.

## Restrict Potato Importation

Guarding Against the Introduction of Wart Disease

The potato growing industry in Canada is being safeguarded against the introduction of "wart disease" by a recently enacted regulation of the Department of Agriculture at Ottawa. Potatoes grown in Europe, the Canary Islands, Newfoundland, the islands of St. Pierre and Miquelon, and the state of California, may no longer be imported into this country. Shipments from the states of Pennsylvania, West Virginia and Maryland are admitted only when accompanied by a certificate, duly signed by a state or federal official, that the stock was grown outside any quarantined areas within those states, and has been found on examination to be free from wart disease. The certificate must also make it clear that the potatoes have not been in contact with infected potatoes, containers or materials. Potatoes coming from all other of the United States must be accompanied by an official certificate giving the name of the state in which the stock was grown.

## Charged Cell Rent

After Mrs. Martha Gunn had slept for three weeks in a cell at Worcester, Eng., police magistrates had forgotten the nature of the charge against her. But she was compelled to pay a small fine "as cell rent," the judge explained.

Lady (in wrong department)—Have you Dickens "Cricket on the Hearth" Salesman—No, madam, but I can show you a very good table-tennis set.

## Alberta Poultry

Alberta Has Higher Average Number Of Poultry Per Farm Than Other Provinces Excepting B.C.

With the exception of British Columbia, Alberta has a higher average number of poultry per farm than other provinces in Canada, according to figures prepared. Canada's average number per farm as a whole is 654, but Alberta's average number is 729. British Columbia's average number is 95.6. The comparative figures are as follows: Prince Edward Island, 60.4; Nova Scotia, 17.9; New Brunswick, 28.2; Quebec, 49.7; Ontario, 79.1; Manitoba, 61.7; Saskatchewan, 76.2; Alberta, 72.9; British Columbia, 95.6. Alberta's number of milch cows per farm is 4.9, compared with 5.1 for all Canada. Alberta's number per farm is higher than the other western provinces, and is exceeded only by Quebec and Ontario.

## Plans Research Institute

Hon. T. A. Low, minister of trade and commerce, intends to bring down an amendment to the Research Council Act and to provide for the establishment of a National Research Institute. The amendment will further provide that employees holding a permanent position under the Research Council will be entitled to the benefits of any public service superannuation legislation.

## The Same Thing

The woman asked at a holiday resort library for a book called, "The Week of Ethel." The sub-librarian failed to recognize the title, and, therefore, asked the help of her chief. He lamely said, "Does the lady list?" "Yes," replied the sub-librarian. "Then give her 'The Weaker Vessel.'"

## Flour Production

Milling Industry In Canada Is In Flourishing Condition

Wheat flour production in Canada during the period September, 1922, to April, 1924, amounted to 11,628,159 barrels, as compared with 11,061,598 barrels in the same months a year ago. The exports of wheat flour during the eight months have shown a somewhat greater increase than has actual production. Of the 11,628,159 barrels produced in the period, up to April, 1924, no less than 8,790,570 barrels have been exported. This compares very favorably with the same period a year ago, when of a total production of 11,061,598 barrels, 8,087,739 barrels were exported.

## Wreath Lasted Through Centuries

Faded Flowers Found On Tomb Of Egyptian King

"Nothing is all the wonder of that splendid tomb was quite so beautiful as those withered blossoms; that little touch has made the ancient world akin to our modern civilization." In these words, Howard Carter, archaeologist and co-worker with the late Lord Carnarvon at the tomb of King Tutankhamun at Luxor, referred to the permanent position under the Research Council will be entitled to the benefits of any public service superannuation legislation.

## Disqualified

The caller begged the little daughter of his hostess for a kiss. "Kissing is only for children," she told him. "Well, aren't you a child?" he asked. "Perhaps," she replied, "but I don't call you one."

## The Purpose of Life

Is To Accomplish Something Worth While and Improve Ourselves (By Albert Apple)

The Chinese have something mysterious and theatrical in their make-up that has always fascinated the white man. It's the attraction of extremes. The healthy white man usually is a surface thinker. The Chinese have subterranean minds.

About 225 years ago a rich Holland named Huddle felt the lure of the Orient. He went to China, mastered the language, and—looking a lot like a Mongolian—actually became a mandarin. For thirty years he travelled all over China, studying the people. All this time he was writing down his observations in great detail. Finally, when he apparently had fathomed the Chinese mind and accumulated a wealth of information, he returned to Holland.

His ship was wrecked. He was rescued. But all of his records, the observations of thirty years, sank in the ocean. A storm had wiped out his life's work.

Huddle has been dead these two centuries. His name would be obliterated now, his existence entirely forgotten, if the elder Disraeli had not heard of him and told his story in "Curiosities of Literature."

We do not know how he reacted to his loss. Probably he sat around with a long face and shortened his life by self-pity. If he had acquired Chinese philosophy, he had a good laugh, and decided it was all in the game.

The story of Huddle, after all these years, seems pitifully tragic. But, strip it of its romantic stage setting—China and shipwreck—and all that happened was the loss of thirty years' work.

That isn't anything unusual. It happens all around you every day—men losing their savings through unwise investments; richer men going broke in the stock market or having their patiently created businesses taken away from them by bankruptcy.

Life is a fight for reliefment. And then, gradually, one by one, the best of everything we have toiled for, Friends die. So do relatives. Children marry and leave. Our favorite customs and thoughts become obsolete. Illusions are destroyed.

Finally, death takes us—and whatever we have salvaged from the shipwreck of life has to be left behind. But—

We carry with us actual achievements of life, just as Huddle could not lose his thirty years of experiences in China though his records sank under the sea. We have the satisfaction of having done things while here and of having improved ourselves, if we live wisely. That's the purpose of life, the great spiritual gymnasium.

## Searching For Old Volumes

Library of Ivan IV, Believed to Be Concealed in Moscow

Search for the secret library of Ivan IV, known as "the Terrible," has been taken up by the Soviet authorities in Moscow, according to descendants of Doctor Paul Westermann, a clergyman of Dorpat, who originally started the task some 200 years ago.

Records kept by Dr. Westermann, which are in possession of his relatives, show that the library now being sought consisted chiefly of books in the old Greek and Egyptian languages dating back as far as the fourth century. Many of these had been taken to Moscow by the Greek Princess, Sophie Palaeologa, at the time she became the bride of Ivan III. Ivan the Terrible became obsessed with the idea that efforts were being made by all the world to rob him of his treasures, especially his library, and it was on this account that he concluded to remove the books to a great dungeon beneath the Kremlin walls for safekeeping.

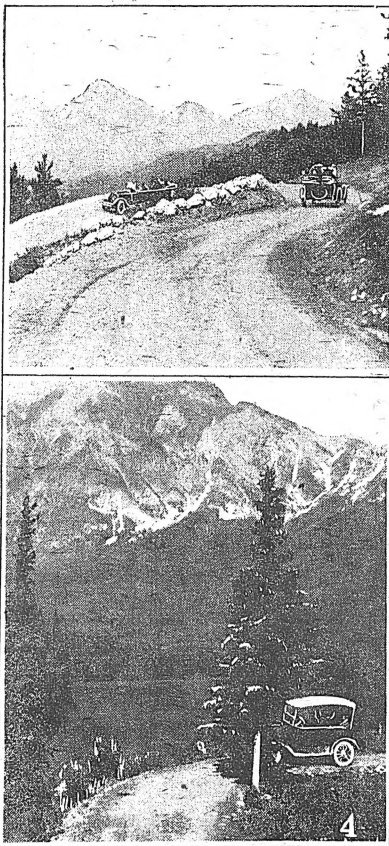

According to tradition the secret hiding place selected by Ivan was known to but few at the time, and no diagram was kept of the location. The workmen who built the tomb for the books began to disappear, one by one, after the work was done, and so the story goes, within a short time, none of them were left. All had been put to death by order of Ivan, who alone held the secret of where his treasures were kept.

## The Focus of Empire

The men who have planned the British Empire Exhibition deserve a place in history. They have performed the miracle of bringing the Empire to England. In one day the ordinary citizen can learn as much of our great inheritance as a traveller might do in a year. It is quite true that the real Londoner boasts of never having been to the Tower, or the National Gallery, but if he studies the Empire of the British brought to his door his indifference descends to sheer sluggishness.—London Daily Express.

Schools for scandal are also badly overcrowded.

## BY MOTOR AND PACK HORSE THROUGH CLOUD WONDERLAND

For the man or woman in search of healthful recreation—rest for jaded nerves, and a thoroughly enjoyable holiday, the world offers nothing more entrancing than a holiday in Jasper National Park, Canada's wonderland of scenery, where mountain, crag and torrent vie with one another in claiming the attention and whose scenic nature is at her best. Towering peaks rise to the north, south, east and west; mirrored in the beauty of placid lakes whose shores provide shelter for the myriad wild life for which the largest of Canada's national parks is famous.

Whether the tourist goes sightseeing by motor car or by the more romantic pack trail, Jasper National Park offers him the best that can be found anywhere. Motor roads and pack trails radiate in every direction from Jasper Park Lodge, the magnificent log cabin hotel of the Canadian National

Railways, and the tourist may engage either ponies and guides or an automobile and thus see the mountains at his pleasure.

Mount Edith Cavell, named in honor of the memory of Britain's heroine, rises by the side of Mount Sparrow, within a short drive of the Lodge and is one of the favorite drives of visitors to the Lodge. The Cavell highway, smooth-faced, winds up toward the very foot of the Ghost Glacier, presenting to the visitor a new vista of scenic wonders at every turn. As one rides toward the foot of the glacier, the Athabasca Valley far beneath presents an attractive picture of calm loveliness, while here and there a lake, reflecting blue sky and sunshine, adds its touch to the beauty of the landscape. There are other drives which may be taken in comfort—one may go in an hour, for instance, to the wonderful Maligne Canyon, one of the natural wonders of the entire Rocky Mountain region, where rushing waters go tumbling and foaming through a narrow aperture worn in the rock, two hundred feet below the feet of the towering cliffs or stand on one of the footbridges which span its narrow width. At any turn of the road the visitor may find himself face to face with a bear or a deer, walking calmly across the highway, while on the sides of the mountains he may see mountain sheep or goats grazing.

The tourist to whom strolling appeals will find plenty to hold his attention. Pack trails may be followed for miles, when in the company of an efficient guide, one may set forth to explore regions which are beyond the reach of the motor tourist. The wondrous Maligne Lake and Medicine Lake, with

their quota of mountains reaching down almost to the water's edge, draw more and more tourists every year.

For years the wonders of Canada's national parks have been better known outside of Canada than they have been to Canadians, but year by year that they have, in their own country, scenic attractions which are not surpassed anywhere in the world; and consequently the number of Canadians registering at Jasper Park Lodge is showing remarkable increases. Comfortable, sleep-heated cabins are provided for their accommodation, an excellent cuisine is maintained at the main lodge, where surroundings and service are of the world famous Canadian National Railways standard and every care is taken to see that visitors to Canada's largest and finest national park enjoy their outing to the full.

For the man or woman in search of healthful recreation—rest for jaded nerves, and a thoroughly enjoyable holiday, the world offers nothing more entrancing than a holiday in Jasper National Park, Canada's wonderland of scenery, where mountain, crag and torrent vie with one another in claiming the attention and whose scenic nature is at her best. Towering peaks rise to the north, south, east and west; mirrored in the beauty of placid lakes whose shores provide shelter for the myriad wild life for which the largest of Canada's national parks is famous.

Whether the tourist goes sightseeing by motor car or by the more romantic pack trail, Jasper National Park offers him the best that can be found anywhere. Motor roads and pack trails radiate in every direction from Jasper Park Lodge, the magnificent log cabin hotel of the Canadian National Railways, and the tourist may engage either ponies and guides or an automobile and thus see the mountains at his pleasure.

# RHEUMATISM GONE, SAYS MONTREAL HOTEL MAN

## F. A. Mongeau Tells How He Recovered Strength After Eight Years Of Rheumatism.

F. A. Mongeau, popular night clerk at the Prince of Wales Hotel, 17 and 19 McGill College Avenue, Montreal, Canada, tells his name to further the cause of Tanlac, the treatment that has proved of such great benefit to him.

"After all Tanlac has done for me," said Mr. Mongeau, "I just feel like praising it to everybody. Eight years of muscular rheumatism had just about made a cripple of me, got to where I simply had to limp around on a cane. My nerves became affected, my sleep unsteady and I felt completely knocked out."

"Six bottles of Tanlac, taken eight months ago, made a new man of me and I have had no further trouble with rheumatism, or my health, since. My nerves are steady as a die, I sleep fine and feel the same way. Anyone wanting to know of me what Tanlac will do, just phone me here at the hotel."

Tanlac is for sale by all good drug stores. Accept no substitute. Over 40 million bottles sold.

Tanlac Vegetable Pills For Constipation. Made and Recommended by the Manufacturers of Tanlac.

## Foretells Roadhouses For Air Travellers

British Air Minister Takes Peep Into the Future

After having taken a peep into the future, Air Minister Lord Thomson came down to the House of Lords recently and assumed the role of prophet. He said in three years' time he hoped to have in the way of two kinds of airships suitable respectively to commercial and naval purposes. In ten years he hoped to see at least six airship constructors competing for orders in this country and building up a great and growing industry, serving the purposes of imperial communication, bringing people of the empire and the world closer together, and carrying freight as well as mails.

Sometime in the future, the minister said, he foresaw the day when noble lords would leave Parliament House on gliders with light engines, and wing their way westward along the Thames valley or northwards to Scotland. On their way they will need a rest and perhaps they may call in at some great transatlantic floating serene, safe, high up, far removed from terrestrial fuss and noise.

## Mathematicians To Meet

Seventh International Congress To Be Held In Toronto In August

Mathematicians from all parts of the globe will attend the Seventh International Mathematical Congress, which is taking place in Toronto in August, concurrently with the meetings of the British Association for the advancement of science. All previous sessions of this body, which constitutes an international parliament on mathematical matters, have been held in Europe. Over 150 delegates from Europe will attend, as well as representatives from the United States and Canada.

## B.C. Lumber Shipments

British Columbia lumber orders are reviving from Japan, and about two million feet were ordered within the past few days. In addition there is a full cargo of this ordered for Port Sudan delivery, and there are new orders coming from China. Within the past week probably ten million feet of lumber has been ordered from British Columbia mills.

It's all right for a man to talk himself up provided he doesn't run others down.

Sample Free For Mail. Address: Cuticura Dept., P.O. Box 100, Portland, Maine, U.S.A. Write for your free sample.

W. N. U. 1532

## WORLD HAPPENINGS BRIEFLY TOLD

Modern methods of white-killing have become so effective that there is danger of the great sea mammals disappearing from southern waters. Charles E. Moyle, 75, for many years vice-principal and dean of the faculty of Arts at McGill University, is dead.

Dr. Helmut Held, newspaper owner and leader of the Bavarian People's party, has been selected as the Bavarian premier to succeed Dr. von Kulling.

Premier Herriot asked and was given a vote of confidence of 166 to 28 on a 205,000 franc appropriation to cover expenses of the occupation of the Ruhr.

Dentists from all parts of the Dominion and Pacific states will gather in Vancouver from August 4 to 9 for the annual convention of the Canadian Dental Association.

The government is carrying on negotiations with shipping interests in Britain, with a view to securing a reduction in the ocean rates on Canadian cattle.

An issue of province of Alberta bonds amounting to \$750,000 bearing interest at 5 per cent. and repayable in fifteen years has been awarded to a Toronto syndicate at a price of \$97.66.

## Is Your Nose Stuffed With Cold?

Don't load your stomach with cough medicine. Send healing medication through the nostrils—send it into the passages that are inflamed with Catarrh. It's easy to get rid of a bad cold, to drive out Catarrh, to strengthen a weak throat by inhaling Catarrhine. Get Catarrhine from your druggist today. By using it frequently you keep the air passages free from germs, and thereby prevent many a bad cold. Two months' treatment \$1.00; small size 50c. Refuse a substitute. By mail from The Catarrhine Co., Montreal.

## Let West Finish It

Plan to Hand Over H. B. Railway Meets With Favor

If Parliament at the present session does not make provision for the early completion of the Hudson's Bay Railway, the "On-to-the-Ocean" Association is in favor of the suggestion of Sir Henry Drayton that the uncompleted line be handed over to the prairie provinces, "upon equitable terms."

A resolution to this effect was passed at a meeting of the executive of the association held in Winnipeg. The Federal Government is urged to make an offer to the prairie provinces "or any of them" which will include "all of the physical assets of the uncompleted line, plus the unexpended balance of monies collected under land sales contracts entered by the Government of Sir Wilfrid Laurier for the completion of the Hudson's Bay Railway."

## Dairying In Saskatchewan

Figures Indicate Big Increase of Dairy Products Over Last Year

Reports of the creamery output of the province of Saskatchewan for the month of April received at the dairy branch in Regina show a total of 697,067 pounds of butter manufactured. This is an increase of approximately 25 per cent. over the same month last year, when the output for the province was 558,230 pounds. During the first four months of 1924 the creameries of the province manufactured 2,336,530 pounds of butter, as compared with 1,832,536 pounds in the same period a year ago.

For Both House and Stable.—There is a good deal of similarity, physical or speaking, between human beings and the lower animals. Both are subject to many ailments arising from inflammation and to all manner of cuts and bruises. Dr. Thomas' Electric Oil is an entirely reliable remedy for such ailments and mishaps in both human beings and the lower orders of animals.

World's Deepest Well.—The world's deepest well is near Gobiela, France. Boring was started in 1882, and by 1914 a depth of over 10,000 feet had been reached.

Easy Matter.—"Oh, dad, there's a big black bug on the ceiling."

"All right step on it and don't bother me."

MADE IN CANADA BY THE MURINE COMPANY

## Sir Henry Thornton On Finance

Canada As a Field For Investment Of American Capital

In addressing the thirty-first annual convention of the New York State Bankers' Association held last week in Montreal, Sir Henry W. Thornton, president of the Canadian National Railways, placed before the gathering the fine investment values of the great natural resources of the Dominion, which he stated had hardly been scratched. The economic situation of the United States and Canada demanded that these natural resources of Canada be developed along sound and practical lines, and he urged the Bankers, as counsellors of those who had money to invest, to educate their clients in the benefits to be derived from investments in the vast mineral and other natural resources of the Dominion. The speaker said in part:

"Despite the fact that much publicity has gone forth, much yet to be accomplished to appraise Americans that the time is more opportune than ever for those from the United States to make investments here. We have more coal in Canada than we have in the United States; we have natural resources and mineral deposits whose surfaces have not been scratched and with lands sparsely populated, it is up to you bankers to educate your clients of the benefits to be derived from investments here. Canada will so grow and blossom forth that she will stand out as one of the greatest of all countries."

"Bankers are playing a big part in the affairs of the world today and it may be truthfully said that no body of men in the universe of finance has done so much to alleviate distress of nations, governments and peoples as have the bankers of the United States. Financial crisis which have struck panic into the hearts of mankind have been faced by United States' bankers with that show of 'front' that characterized the soldier when he went 'over the top' during the World War. And there are no motivations for such services as this class of service has rendered. Rather did these men appear satisfied with having done a deed well and having done that duty which their position gave them the power to accomplish."

"Remembering the position now held by the United States, it must be plain to the government of that country to the south that she cannot divorce herself from world affairs, and it is to continue to occupy the place in the world that her deeds have entitled her to, she must take greater interest in international affairs. Civilization has passed through the greatest crisis in the history of the world; there are many wounds yet raw, but unless these are bound up and friendships renewed, there are grave dangers that further complications will ensue. It almost seems that the winnings of the war were earlier than the winning of peace, and problems that followed are very difficult of solution."

"The safety of civilization rests in the hands of Great Britain and the United States. War is the only game I know where both sides lose. When our two countries join hands for the prevention of wars, there shall be no more."

## A Divorce Granted

After years of patient suffering, you can be divorced from corns, you can get rid of them completely by applying Putnam's Corn Extract. This wonderful old remedy acts in 24 hours and never fails. Refuse a substitute and remember that Putnam's is the only Painless remedy. 25c everywhere.

## London Has Sunlight League

Teaches How Light and Air Will Cure Disease

Of all the new societies that have been started in recent years the Sunlight League seems to us the most likely to do solid and lasting work for the benefit of mankind. Its aim is, not merely to teach the benefits of sunlight cures for diseases and debility, but to make everyone understand how these evils may be warded off by abundance of light and air in our homes and work-places. Without such aid to health and enjoyment, we cannot make the most of our lives. Smokeless stoves, "sunlight" and "air dwellings"—these are what the Sunlight League demands. All power to it!—London Daily Herald.

## Large Percentage Of 1924 Crop In the West Will Be Sold Through Co-operative Pools

The 1924 crop from between 10,000 and 11,000,000 acres of western lands will be sold through co-operative pools. The Alberta pool has been operating since last year and already has a large acreage signed up, while the Manitoba and Saskatchewan pools are now engaged in signing up acreage, and it is anticipated that the latter two pools will handle the grain grown on some 8,000,000 acres. Plans are now afoot to merge the three pools into one central selling organization, and it is possible that such a merger will be effected in time to market the 1924 crop.

## Many Mothers Have Reason to Bless Mother Graves' Worm Exterminator

Because it has relieved the little ones of suffering and made them healthy. Compiling Footwear Dictionary. Emile Jaffert, a Stockholm shoemaker, is now in London to complete a dictionary of technical terms in the leather and footwear industry. He has been awarded a cash prize for the purpose by a Swedish foundation as a contribution to the cost of the trip abroad for the purpose, and will shortly go to the United States. Jaffert is especially interested in orthopedic shoemaking and already has enriched the Swedish section of his dictionary with 2,400 words.

## Mrs. Broome: "And 'ow do yer 'usband and myself get along together?"

Mrs. O'Brien: "Well, I hope!" Mrs. O'Brien: "Oh, yes, very well. Mrs. Broome: 'Er we've been married 'goin' on six months, an' I ain't 'ad to call in the police but twice."

## SUNDAY SCHOOL LESSON

JULY 13

### THE BOYHOOD OF JESUS

Golden Text: Jesus advanced in wisdom and stature, and in favor with God and men. Luke 2:52. Lesson: Luke 2:40-52. Devotional Reading: Psalm 119:9-16. Reference Material: Matthew 21:28; Luke 2:29.

The Text Explained and Illumined I. The Development of Jesus, versus 40. Little every one who has ever lived, Jesus entered into the world as a helpless infant, and like all normal children his powers developed gradually. As a child he grew, and waxed strong, filled with wisdom, and the grace of God was upon him. "You recall the Child Jesus in a picture at once, by a halo around his brow. There was no glory in his real life to mark him; we know this for in after years his brethren thought his fame strange, and his townsmen rejected him. Gradually and gently he woke to consciousness of life and its manifold meaning; gradually, and not at once, he embraced the sphere of human duties, and he came to his earthly relationships one by one—the Son, the Brother, the Citizen, the Master. It is a very deep and beautiful and precious truth that the Eternal Son had a human and progressive childhood. Happy the child who is suffered to be and cannot be what he meant him to be—a child while childhood lasts!" (O. W. Robertson.)

II. Women were not obliged to attend the Feast of the Passover at Jerusalem, but Mary accompanied Joseph on his annual pilgrimage. When Jesus was twelve years old his parents took him with them for the first time, because he was approaching his thirteenth year when, according to Jewish custom, he would become "a son of the Law" and subject to its obligations. Three times Joseph is referred to as the parent or father of Jesus, versus 41, 42 and 43; Dr. Garvie explained that "Joseph is rightly described as one of Jesus' parents, for in the home he provided and protected, he a large part of the place and played a parent's part. To him also God committed a trust and task."

## Big Wheat Pool

Large Percentage Of 1924 Crop In the West Will Be Sold Through Co-operative Pools

The 1924 crop from between 10,000 and 11,000,000 acres of western lands will be sold through co-operative pools. The Alberta pool has been operating since last year and already has a large acreage signed up, while the Manitoba and Saskatchewan pools are now engaged in signing up acreage, and it is anticipated that the latter two pools will handle the grain grown on some 8,000,000 acres. Plans are now afoot to merge the three pools into one central selling organization, and it is possible that such a merger will be effected in time to market the 1924 crop.

## Many Mothers Have Reason to Bless Mother Graves' Worm Exterminator

Because it has relieved the little ones of suffering and made them healthy. Compiling Footwear Dictionary. Emile Jaffert, a Stockholm shoemaker, is now in London to complete a dictionary of technical terms in the leather and footwear industry. He has been awarded a cash prize for the purpose by a Swedish foundation as a contribution to the cost of the trip abroad for the purpose, and will shortly go to the United States. Jaffert is especially interested in orthopedic shoemaking and already has enriched the Swedish section of his dictionary with 2,400 words.

## Mrs. Broome: "And 'ow do yer 'usband and myself get along together?"

Mrs. O'Brien: "Well, I hope!" Mrs. O'Brien: "Oh, yes, very well. Mrs. Broome: 'Er we've been married 'goin' on six months, an' I ain't 'ad to call in the police but twice."

## Wants Base At Singapore

Needful For Safeguarding Empire Says Canadian Navy League

That the Navy League of Canada should, through its executive, ask the Dominion Government to bring to the attention of the Imperial Government the need of Singapore as a naval base that will safeguard the security of the Empire, was the substance of a resolution introduced and adopted unanimously by the Dominion Council of the Navy League.

Preliminary to the resolution President Samuel Harris read a statement he had prepared on the subject, examining the question from the standpoint of strategy, international relations and the financial aspect.

The president based his observations on the remarks in the British press that Canada had not yet tendered any advice on the subject of the proposed naval base at Singapore to protect the Pacific.

## An Experiment That Must Be Made

Demand From West That The H. B. Railway Must Be Completed

The "facts" upon which the Montreal engineers base their demand for a complete "investigation" into the Hudson Bay route are not facts at all; they are merely opinions, and there is an abundance of opinion on the other side. Indeed, seven members of the Institute voted against the resolution on the ground that their western colleagues might hold a different opinion. Nothing but experience will show which set of opinions is right, and all political parties in the country are committed to the policy of making the experiment in the national interest. Experiments of this kind are necessary in a young developing country, and that is the prime justification for the demand that the Hudson Bay Railway be completed and the route opened up.—Grain Growers' Guide.

## A PIED PIPER

In Billy's job, as in many positions where men have won fame and distinction, it is personality that counts. It is his mission in life to inspire confidence, and to lure innocent sheep and lambs to their destruction with as great alacrity and lightness of gait as if they were skipping to the fields of Elysium, and this he does to the King's taste; he was born for his task. Though but two years old he has a substantial beard, and long white hoary locks. His mien is gentle and there are no horns visible which might give rise to fatal suspicions. But in his eyes there is an air of command, backed by the force of a portly frame, which enables Billy to do what he will with the sheep and lambs which come within his ken, and even influences calves to take a straight path. In the busy season he saves the salaries of five men; in ordinary times he does the work of two or three.

He was three months old when he arrived at the Canadian Pacific Stock Yards, Montreal, but he took to the work at once. He followed the heels of the men, and while other animals tried at the work had to be coaxed to labor by rewards of cake and biscuits, Billy needed no such spur, but in three months time would glance at the sheep comfortably, start off at a cheerful trot and without hesitation the doomed animals would surround him and happily ascend the winding runway to the abattoir nearby. Then at a command he would go back and coax any stragglers, till he had all at hand ready to be slaughtered.

Now to look at Billy, it might seem that he did this work in all innocence, and that he was quite unaware that he had led his charges to any harm; but that would be doing an injustice to Billy's mighty intellect. He leads the flock right to the edge of the platform where they are killed, but then he carefully edges to the wall, keeping as far as possible from the danger point till he reaches the only spot of safety, then he slides back from the helpless sheep, wriggles out and goes back for another lot.

His treachery does not weigh on his spirits, he is utterly complacent and self-satisfied, impatient to be on-the job.

## Local News

Mrs. W. A. Cruickshank and family left on Tuesday for Didsbury where they will spend a holiday.

Mr. J. P. Watson and Mr. N. McLean attended the Acadia U.F.A. Convention held in Cereal last Saturday.

Mr. and Mrs. W. Osmond, of Ryerson, were visitors in the district last week-end.

Mrs. F. McKenzie, who has been staying in Drumheller, is a visitor in Calgary during the Stampede.

Mrs. J. S. Smith left on Tuesday for Carstairs, where she will visit her daughter, Mrs. William Dexter.

Miss M. Stewart, of Victoria, who arrived in town Tuesday, is visiting at the home of Mr. and Mrs. N. D. Stewart.

Quite a number from Chinook attended a baseball tournament held at Empress yesterday.

Miss Cecilia Fox, of Calgary, visited a few days this week with her sister, Mrs. O. Hinds.

Mr. N. McLean was a Youngstown visitor Monday.

The name of Verton Maris was omitted in the list of pupils who were successful in passing their examinations in Grade VII of the Chinook school.

Mrs. J. Massey is a visitor in Calgary this week.

## Sale of Unclaimed Horses

The second auction sale of horses rounded up in the recent round-up covering southern ranges, will be held at Brooks, July 24. Chas. Mickle is the government representative in this sale.

## Good Price For Bonds

Provincial bonds to the extent of \$750,000, being the new high-way sinking fund issue, were disposed of by the Province during the past week at the satisfactory price of 97 688, giving a yield of 5.22. The successful bidders were a syndicate composed of the Dominion Securities Corporation; Wood, Gundy & Co. and A. E. Ames & Co. In view of the fact that Manitoba recently sold a Canadian payment issue at 95.43 with a yield of 5.29, and an American payment issue at 97.07 yielding 5.24, the Alberta sale is considered to be most satisfactory.

Don't mind criticism. If it is untrue, disregard it; if it is unfair, keep from irritation; if it is ignorant, smile; if it is justified, learn from it.

## Camping-time

Now that the holiday season is here those who are able to get away for a while will probably be going camping. What boy or girl is there who does not like the experience of camping. To wake in the morning in the midst of the great outdoor world, to lie still, if the other fellows will let you and hear the bird's songs and the rustling of the forest leaves; to plunge in the stream; to tackle the eats with an appetite which a millionaire might envy; to fish; to hike—all these and many more give zest to life in the open. Annie Johnson Flint, in her poem "The Camp Fire" brings out our imagination of the great outdoor and makes us long to go:

Dreamily flickers the evening fire  
While the dark shadows creep  
Higher and higher;  
Daylight is ending, quiet's descending  
Earth sounds and air sounds in  
peacefulness—blending;  
Dim through the tree top the star-  
light is falling  
Soft in the silence a drowsy bird's  
calling;  
Sleepily winking, stealthily blinking,  
All the red coals into ashes are  
sinking.  
Cover the embers lest it burn higher,  
Dreamily, drowsily smoulders the  
fire.

Good night.  
There are a number of our boys and girls who will not be able to have the experience of camping unless it is done by united effort. We have the Boy Scouts and the C.G.I.T. girls in our midst who we should try and help to get to camp this summer.

We are trying to make arrangements whereby it may be possible that every one of these boys and girls may spend a few days camping this year. In order to do this we want your assistance. We shall need cars and financial help. We want every citizen to throw in their lot and give the boys and girls a real good time. They are only children once.

While we are on this subject we might mention the fact that our Sunday School picnic is drawing near and the teachers are making a strenuous effort to take all the children to Gooseberry Lake for a day in August while the older boys and girls are camping out there. We are planning to set a day apart in August when we want every one to join us in helping to give the kiddies a real red letter day at Gooseberry Lake. If you are willing to help by loaning your car or helping in any way possible send in your name to the Chinook Advance. Your assistance will be appreciated, and by making others happy you will be surprised what pleasure it will give you. Now altogether for a real community picnic at Gooseberry Lake.

A great many people to-day are wandering away from God. Perhaps they do not mean too, they are just going where the grass is greenest and the walking easy; step by step, not meaning anything, not knowing where they are going, or if they are going any place, they go and go until one day they wake up to find themselves away from the beaten paths and they will never find their way back unless they return to God they have deserted. If man of today would only believe that a loving, living Person is really seeking him, seeking him in every walk of life, seeking him by His gospel, and His Spirit; and will never be satisfied until He has found him, and in finding him turns his soul to God. Everybody cordially invited to hear this discourse at Chinook Church next Sunday.

Mr. A. O. McNeill is a visitor in Calgary this week.

## Judicial Sale of Village Property

Pursuant to final order for sale issued out of the Supreme Court of Alberta in action S.C. 551, there will be sold by James LeRoy Carter, Auctioneer, at Acadia Hotel in the Village of Chinook at 1 p.m. the 19th day of July A.D. 1924, the following lands and premises in one parcel viz: Lots 21 and 22 in Block 1 Plan 2231, B.A. Chinook, subject to taxes from the 31st day of December, 1923 and to the reservations and conditions in the Grant from the Crown or in the existing certificate of title. The Vendor is informed that the property has a frontage of 60 feet on Railway Avenue and runs 120 feet to a lane, and has erected thereon the following buildings:—

One frame residence, one and a half stories high in fair state of repair, and

One frame Livery Barn 30x64 feet with addition.

The sale will be subject to a reserve bid fixed by the Court.

Terms 15 per cent. of purchase price to be paid in cash at the time of sale, to the Plaintiff's solicitor and the balance into Court as follows: 10 per cent. in 30 days; 10 per cent. in 3 mos.; 10 per cent. in 6 mos.; 15 per cent. in 10 mos.; 20 per cent. in 16 mos., and balance 20 per cent. in 24 months, with interest 6 per cent.

In all other respects the terms and conditions of sale will be the standing conditions of sale as approved by the Court.

Further particulars will be made known at the sale or can be obtained from Walter M. Creckett, Esq., Solicitor for the Plaintiff at Youngstown, Alberta.

Dated at Hanna, Alberta, this 25th day of June 1924.

H. J. ADAMES,  
Clerk of the Court

Approved:

J. D. R. S.

A. J. S. C.

If you make the children happy now you make them twenty years from now by the remembrance of it.

Th road to success is paved with good advertisements.
